

Dubai:- In a milestone achievement, GCC Vision , a Dubai based networking firm successfully held the First GCC International Investment Summit, with aplomb and grandeur in presence & witness of the Honourable Royal family members and Business tycoons .

Investors and entrepreneurs from as many as 40 countries turned to Dubai for the Summit held at Dusit Thani Hotel on 5th November, 2022.

The Summit as the name suggests hinted at opportunities that exist across the GCC region, in a seemingly appropriate exercise that saw both sister concerns in GCC Vision and BMS Auditing, whose geographical spread encompasses the entire GCC use their network client base to attract a large number of investors seeking to invest within the GCC Region.

GCC Vision took the opportunity to announce a Business Forum that it launched today at the ceremony.

The forum shall serve the purpose of being a perpetual platform for common minded entrepreneurs, high end CEO's, industry and market leaders and business owners from across GCC where matters of common interest in events, networking and business connections shall ensure periodic interactions of mutual interests between corporates and individuals as told by CA Shehinsa KP ,The Chairman of GCC Vision & the Master brain behind the idea turned reality of The Gulf Investment Summit.

GCC' Vision hence intends to ensure they hold monthly events across the region where potential investors and entrepreneurs come together to interact regularly and build their professional network and build their dreams together.

The event saw 100's of registrations marking entrepreneurs' interest in the networking forum concept , marking the dawn of a new business networking concept that looks to enhance potential Business investor relationships through common networks with regular interactions by traditional meet or greet or more tech specific connect methods relevant to the business market today.

The summit ended on a high note with an evening that saw GCC Vision promise a network of professionally targeted events across the Region in the coming Quarters and the overwhelming response suggested the concepts' appeal to the business community.
